

Compliance in Practice – a Code in Practice Workshop

The workshop will enable attendees to develop and implement company procedures which effectively meet both Code of Practice requirements and the needs of the business, and to use audit as a means of ongoing management of these procedures.

The workshop will address in detail the issues and practicalities involved and what is considered good practice in all relevant areas.

Who should attend?

Compliance Managers or others with responsibility for ensuring company compliance with the ABPI Code of Practice. A good working knowledge of the Code is required.

As the workshop will be very practically focussed, numbers are strictly limited
